

## PowerSchool® – The SIS Choice for International Schools

PowerSchool is the fastest growing, most widely used web-based student information system (SIS) available today. By leveraging the latest web technologies and evolving web design standards, PowerSchool is designed to maximize end-user adoption while delivering data integrity and security. PowerSchool was the first to redefine the modern SIS by including a gradebook and parent portal as natural, cost-free features. Today PowerSchool includes a wide variety of functions and supports a wide range of schools in more than 60 countries.

### Administrators

PowerSchool provides the full range and depth of features needed by administrators at the district and school level.

- Administrator dashboard
- Daily bulletin board
- Admissions
- Assessment data
- Centralized enrollment
- Student fees
- Attendance management, tracking, and notification
- Discipline management and reporting
- Emergency/medical information
- Student and faculty schedules
- Powerful and simple ad-hoc queries
- Simplified custom report drawing tools
- Faculty demographics
- Activities management
- Health records
- More than 50 built-in, push button reports
- Student alerts
- Access via iPhone® or Android® compatible phones

### Teachers

PowerSchool leverages the latest web technologies to provide teachers with PowerTeacher, the next-generation web-based gradebook that streamlines administrative activities. In addition, PowerSchool allows immediate and automated communication of student progress with parents, students administrators, and team teachers.

- Web-based gradebook
- Online attendance, assignments and faculty directory
- Robust reporting capability
- Grade analysis and automatic grade averaging
- Daily bulletin board
- Automated emails to parents
- Intervention and ability groups
- Advanced diagnostic, summative and formative assessment
- IB and standards based grading capabilities
- Link assignments to content for parents and students

### IT Staff

PowerSchool simplifies SIS administration with a secure, web-based architecture built on a robust JAVA™ framework and a powerful Oracle® database. PowerSchool leverages a full complement of disaster-proof, redundancy-laden security measures to help you sleep at night.

- Centralized database and servers
- Installer based software updates
- Support for LDAP with multiple domains
- Many security options including SSL and session termination
- System status and database dashboard
- Open design for easy enhancement/customization
- Online support forums
- Live phone support and email support
- Expansive support portal with a vast knowledge base
- ODBC access
- SIF Compliant

### Parents and Students

PowerSchool stands alone as the most frequented parent and student web portal available today. It is not unusual to find more than 90% of a school's student population accessing the portal on a weekly basis - in many cases student usage outpaces their parent's logins 6 to 1.

- Real-time grades and attendance
- Current teacher comments
- Online course requests
- Daily bulletin board
- Course syllabus
- Calendar syncing
- School transactions and fee balance

- Automated email messaging
- Access all children with a single account
- Password recovery

### Counselors

PowerSchool gives counselors the tools they need to track student performance, create schedules, and manage graduation requirements.

- Automated master schedule builder
- Online student course requests
- Walk-in scheduler with section balancing
- Historical grades with audit log
- Standards progress and assessment history
- Graduation progress and career planning
- Mass transcript generation
- Traditional and custom GPA calculation methods
- Graduation planner
